ABOUT NEW WARSHIPS.

Battleshps, Cruisers and Iron-Clad Fight ers to Be Built.

NEW YORK, Aug. 19 .- A special to the Tribune from Washinton says: A naval program for presentation to congress, involving the immediate construction of afteen warships, has It cures been adopted by the naval board of and dyspepsia Stomach experts, to which the subject has been referred by Secretary Long. It provides for three sea-going barbette turret battleships, of 13,000 tons displacement and a minimum 184 knots speed when the yessels are loaded to their deepest draught, or an average speed above 19 knots under ordinary cruiser conditions; three first-class armored cruisers of 12,000 tons and 22 knots speed; armored cruisers 6000 tons displacement, and 20 knots speed, similar to the Maine type, but highly improved, and six protected cruisers of 2500 tons and 16 knots

The reduction in the speed of the ships, which is uniformly about two knots less than that proposed at the preliminary meeting of the board on Tuesday, was brought about by the desire to secure unprecedented range of action on account of the increased responsibilities of the United States in the Pacific and the certainty that these vessels, or most of them, would be required do make up the fleet in that ocean. The sacrifice of speed to endurance was made with a view of securing vessels of at least 8000 knots radious, or capable of steaming straight away from San [Francisco to Manila and Samoa. The board decided that the Pacific, rather the Atlantic would be the seat for the naval opertions in the future, and while great sacrifice to speed could be made to the vessels attached to the outer line of national defense on the east coast of the United States, abnormal coal capacity and high economy were prime requisites as long as distant possessions to the westward required SAN FRANCISCO, Aug. 19 .- A site protection. All the vessels, however, has been chosen at the Presidio reser- will be as speedy as the fastest vessels yation for the Red Cross convaiescent now building abroad, and they will be hospital, which will soon be erected, eminently more practicable in endur-

CONSULAR REPORTS.

China Territory Ought to Be Invaded by American Merchants

NEW YORK, Aug. 19 .- A special dispatch to the Tribune from Wash-

Two or three consular reports, dealng in large part with the Eastern and South American trade, strengthen the views and assertions heretofore communicated to the state department and published. Consul Culvert, writing from Lyons, deals at length with the subject of the French bureau of foreign commerce, recently es-

The writer says that the work of the Lyons commission, sent to China by the business men, is being followed up vigorously. France is trying to keep up with England and Germany in their efforts to supply China, a nation which, to quote from a great European authority, "Is the most potential market in the world." He

"Whether this tremendous market shall be a feeder to Russia's trans-SIberian railroad, to England through Hong Kong, to Germany through Kiao Chou, or to France to Tonquin, is the momentous problem of the coming century."

Consal Monoghan writes from concerning Germany's shipping, and the other, concerning her machinery exports, throw much light on a great trade rival's operations. Compiling her figuers it is seen that there was an increase in 1896, over 1865 of 13,706 ships and 900,000 tons. Compared with twenty years ago, the figures show twice the

much tonnave. The consul says: "If we are to take part in the trade with South America and with the East we must emu 12-inch rifles in turrets on the center late this empire in the matter of line fore and aft, similar to those of ships. Of all ships that came into the lowa and the second batteries will and went out of German ports in 1896, HAVANA, Aug. 16. - (Delayed in mount fourteen and sixteen rapid-fire 72.4 per cent bore the empire's flag.
